

Single row disc ridger

FKDR-1

Fieldking Disc Ridgers are tractor-mounted implements engineered for efficient ridge and furrow preparation on row-planted crops such as potatoes, sugarcane, bananas, vegetables and more. These disc ridgers are used after ploughing to cut and turn soil, forming uniform ridges that enhance water flow, seedbed quality, and crop establishment.

The FKDR-1 is A lighter disc ridger ideal for tractors in the 50–65 HP range, featuring a two-disc setup that efficiently forms ridges with a working width around 1000 mm. Its lower weight and simplicity make it suited to small-to-medium operations where ease of use and economy are essential.

Specs

General	
Axle Type	Spindle
No. of Discs	2
Type of Discs	Notched or Plain Disc
Disc Diameter	660mm x 6mm
Max Width Between Ridges	1000mm
Ridge Height	330mm
Bearing Hubs	2
Weight	224kg
Tractor Power	50-65HP
